Oozie, Workflow Engine for Apache Hadoop. Oozie v3 is a server based Bundle Engine that provides a higher-level oozie abstraction that will batch a set of coordinator applications. The user will be able to start/stop/suspend/resume/rerun a set coordinator jobs in the bundle level resulting a better and easy operational control.

Oozie – Oozie, Workflow Engine for Apache Hadoop

Coordinator applications allow users to schedule complex workflows, including workflows that are scheduled regularly. Oozie Coordinator models the workflow execution triggers in the form of time, data or event predicates. The workflow job mentioned inside the Coordinator is started only after the given conditions are satisfied.
