be an invaluable asset in both small businesses and Fortune 500 companies and in many areas including the military, human factors, health care, manufacturing, and the service industry. The user manual has been updated for software version 3.8. Some new features are the ability to add swim lanes to any network background, data exchange capability with the UML/SysML tool MagicDraw, and a updated version of the built-in OptQuest optimization.

Provides guidance for water users and districts in selecting, managing, inspecting, and maintaining their water measurement devices. Describes the standard methods and devices used to measure irrigation water. Acquaints irrigation system operators with other established but less common methods and with new or special techniques.

This heavily-illustrated work contains drawings and identification information for more than a thousand mollusks native to New Zealand. Published under the authority of the government of New Zealand, the book took author Henry Suter more than 25 years to complete. Biologists have praised the high quality of the drawings, and the work is considered a landmark in New Zealand conchology.
