A degree in Manufacturing Engineering Technology/technician will commonly not require a considerable amount of time investment and is commonly achieved in only a year or two. The most commonplace Manufacturing Engineering Technology/technician degree earned was an associate's degree and it also has the widest range of school possibilities as well.

studies in each chapter, clearly show that manufacturing engineering is a complex and interdisciplinary subject. The topics are organized and presented in such a manner that they motivate and challenge students to present technically and economically viable solutions to a wide variety of questions and problems, including product design. Since the publication of the third edition, there have been rapid and significant advances in various areas in manufacturing. The fourth edition of Manufacturing Processes for Engineering Materials, while continuing
