On behalf of the PROFES organizing committee we would like to welcome you to the 4th International Conference on Product Focused Software Process Improvement (PROFES 2002) in Rovaniemi, Finland. The conference was held on the Arctic Circle in exotic Lapland under the Northern Lights just before Christmas time, when Kaamos (the polar night is known in Finnish as □Kaamos□) shows its best characteristics. PROFES has established itself as one of the recognized international process improvement conferences. Despite the current economic downturn, PROFES has attracted a record number of submissions. A total of 70 full papers were submitted and the program committee had a difficult task in selecting the best papers to be presented at the conference. The main theme of PROFES is professional software process improvement (SPI) motivated by product and service quality needs. SPI is facilitated by software process assessment, software measurement, process modeling, and technology transfer. It has become a practical tool for quality software engineering and management. The conference addresses both the solutions found in practice and the relevant research results from academia.

This is the first of two volumes, now covering the heads of religious houses in England and Wales from the tenth-century reform to the death of Edward III, 940–1377. This first volume, by the great master of monastic history, Dom David Knowles, aided by Christopher Brooke and Vera London, was published first in 1972 and was quickly recognised as a major work of reference, noted for its mastery of accurate detail. It has now been brought up to date with

File Type PDF Parts List Abb

substantial addenda and corrigenda by Christopher Brooke. The 1972 volume covers the period 940–1216, and comprises fully documented, critical lists of monastic superiors, with succinct biographical details. It is an essential foundation for all prosopographical study of the religious history of the period; and the precise chronology that it underpins is invaluable for dating innumerable undated documents. As such, the book is a fundamental tool of medieval research.
